

Electronic Device Registry

Every year the School Resource Officer assists with recovering lost or stolen electronic devices. Recovery is often not successful without specific information about the device.

We are introducing the *Electronic Device Registry* in order to increase the possibility of recovering a lost or stolen electronic device.

Registration is performed by responding to a Google Forms link sent to a student's John Stark email address. A student then uses the Google Form to register their devices. The list is kept confidential and participation is strictly voluntary. We believe this is the best way for you to help us recover your missing devices.

For more information or to register your electronic devices please contact:
